

EDUCATIONAL IDEAS: TIME TO MAKE A STAND

'Time To Make A Stand' is a song that delivers a simple but powerful message. The songs lyrics have been written to encourage us to be mindful of how we treat each other verbally and physically. Importantly the lyrics also inspire to 'make the most of life in our own special way'.

'Time To Make A Stand', reaches, connects and opens most private inner emotions to audience of all ages and cultures.

'Time To Make A Stand' Primary and Secondary Clip Packages are audio/visual montages that have been created to be a useful tool to assist school communities with the implementation of their personal development programs. They focus specifically on developing resilience, and on the importance of support networks in developing a healthy, positive, safe environment.

Including the enjoyment of music within educational programs offers opportunity for fun, flair, imagination and participation allowing an abundance of creative ideas and connection for unlimited learning experiences. These could be drawings, paintings, dances, video clips or whatever personally or as a group is chosen to embrace the simplicity of treating each other with respect, no matter who we are, where we are, or where we have come from.

We see this song being used as a valuable tool to help break down social barriers, especially if incorporated into all aspects of our lives: school curriculum, community groups, government departments and business corporations throughout Australia and world wide.

If you would like to include 'Time to Make a Stand' in your program or further information please contact:
